Dear all the A members of the IFHE,

I would like to wish you A Merry Christmas and A Happy New Year.

I also would like to express deep appreciation for your kind encouragement, sympathy and the best wishes to myself, my family and Japanese people after being suffered from devastating earthquake occurred on March 11th 2011 followed by big Tsunami, the nuclear exposure as well as other factors such as power outages, shortage of water and food which were shown on the television, newspapers and the internet.

In addition great appreciation of the donation of fund from IFHE to help hospitals suffered from the disaster.

I am telling you the current actual situation in Tokyo as well as Japan are becoming to somewhat ordinary daily living, however a great number of people are still in difficult living and working condition in the north part of Japanese islands.

I am convinced to say that we will definitely overcome the serious problems and I really realized the existence of international supporting network.

Thanks Jacques Roos for the welcoming at last IFHE-European Congress in Paris.

Looking forward, seeing you all on the boat in Norway April 2012.

I wish you this year with full of joy, peace and health.

With very best regards,

Yasushi
